<sup>1</sup> Target Density and Target FAR are for planning/CEQA purposes only. Actual density/FAR on a specific parcel or parcels may be higher or lower as long as total plan area residential units and total commercial GSF does not exceed the allocations in this table.

<sup>2</sup> Dwelling Unit calculation methodology: Gross acres multiplied by 90%, multiplied by target density.

<sup>3</sup> Overall plan area average residential density equals total dwelling units divided by total residential acres multiplied by 90%. (Includes residential acres in HDR, HHMU, OEMU and NMU) 8589 du / 938.4 ac. = 9.15 DU/AC

<sup>4</sup> RHNA allocation requirement equals 30% minimum of the total dwelling units designated at a minimum of 30 du/ac. (Includes residential acres targeted at 30 du/ac in HDR, HHMU, OEMU and NMU) 2675 du / 8589 total du = 31.1%

<sup>5</sup> Estimated Population is based on the following persons per household (pp/hh):

LDR and MDR = 2.92 pp/hh

MHDR, HDR and HDR in Mixed Use sites = 2.44 pp/hh

AAR = 1.8 pp/hh

<sup>6</sup> Quimby Parkland Dedication Requirement is based on a minimum of 5 acres of parkland per 1000 population by using the following multipliers and totals 117.5 acres:

LDR, AAR and MDR are calculated by DU \* 0.0149.

MHDR, HDR, HHMU, NMU, and OEMU are calculated by DU \* 0.0121.

<sup>7</sup> Total parkland area provided includes park acreages in HHMU, OEMU and NMU. 107.6 acres + 10.3 acres = 117.9 acres total park acres provided, which exceeds Quimby Park Requirement.

<sup>8</sup> Estimated employees for HHMU, OEMU and TK-8 school are based on SACOG Blueprint PLACE Type Menu employment generators (50 employees/acre for commercial uses and 20 employees per acre for school uses.) Estimated Employees for NMU, NC and HHMU Civic based on 350 sq. ft. / Employee.

<sup>9</sup> Land use data in this table may not precisely match the Parcel Allocation Table due to rounding.
